SUMMARY

Motivated Java Developer with strong skills in Java, Spring Boot, RESTful APIs, SQL, OOP, and Microservices. Hands-on experience developing scalable backend applications and working with AI technologies such as RAG and LLM-based applications. Seeking a Java Backend Developer or Software Engineer role to build reliable software solutions while applying backend and AI skills.

SKILLS

Languages: Java, Python, SQL

Backend: Spring Boot, Spring Data JPA, RESTful APIs, Microservices, gRPC, Apache Kafka

Databases & Cloud: MySQL, PostgreSQL, AWS EC2, Docker

AI & ML: RAG, LLMs, LangChain, PyTorch, OpenCV, NumPy, Pandas

Testing & Tools: JUnit, Swagger, Maven, Gradle, Git, GitHub, Postman, IntelliJ IDEA

EXPERIENCE

Java Developer Intern – Proxenix

May 2025 – July 2025

Remote

Java, Spring Boot, SQL

- Developed and enhanced **10+** backend modules using **Java** and **Spring Boot** for an e-commerce application.
- Designed and integrated **15+ RESTful APIs** and performed **SQL database operations** for core application features.
- Resolved bugs and optimized backend code, improving application performance by approximately **20%** while collaborating with a team of **5** developers.

PROJECTS

Banking Transaction System – Microservices Architecture | *Java, Spring Boot, Kafka*

May 2026 – July 2026

- Developed a banking transaction system using **Java, Spring Boot, Microservices, and Apache Kafka** for asynchronous transaction processing and fraud detection.
- Implemented **5** backend services with Kafka-based event communication, RESTful APIs, transaction validation, and Docker containerization.

Document Q&A System – Retrieval-Augmented Generation | *Python, RAG, LLMs*

June 2026 – July 2026

- Built a **RAG-based** document question-answering system using **Python, LangChain, LLMs**, document chunking, embeddings, and vector search.
- Built a retrieval pipeline to retrieve relevant document content for generating **accurate, context-aware answers**.

AutoMail – AI Email Response Generator | *Java, Spring Boot, Gemini API*

Sep 2025 – Nov 2025

- Developed an AI-powered email response generator using **Spring Boot** and **Google Gemini API**, tested across **50+** email scenarios.
- Implemented **8+ RESTful APIs** and integrated Gemini using Spring WebClient to generate personalized, context-aware responses in multiple styles.

Patient Management System – Microservices Architecture | *Java, Spring Boot, Docker*

April 2026 – July 2026

- Developed a **5-service** microservices application using **Java, Spring Boot, Spring Data JPA**, and PostgreSQL.
- Built **20+ RESTful APIs**, integrated an API Gateway with **JWT authentication**, and containerized services using **Docker**.

CERTIFICATIONS

- **Programming in Core Java – Infosys Springboard:** Certified in Java, OOP, Collections, Exception Handling, and Multithreading.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Graduated: 2026

Jaypee University of Engineering and Technology, Guna
